PROJECTS

[2022 – 2022] **Skye (IoT)**

My high school final project was an RC car controlled by an android APP.

The car skeleton was an old RC car, the controller board was a raspberry pi connected to the motor and servo motor.

The raspberry pi was connected to Firebase (cloud database from google) such as the mobile APP.

[02/2022 – 04/2022] **Xenox (Software)**

Xenox is a stock managing software developed in Python 3 using KivyMD package and MySQL.

Xenox users are able to register users, manage stocks, sections, employees and change/edit data.

It was one of my High School final projects.

Link: https://github.com/ATEK0/Xenox

[04/2023 – Current] **TeamBridge (FullStack Development)**

TeamBridge is a platform made to increase team productivity, communication and team work.

This is an online platform to have a better team management and a centralized working environment. It allows users to save and share files, assign tasks, create notes and chat with each other, everything inside the same platform.

Team Work

I'm a person that likes to be in a team but also to work alone. I'm very devoted to my projects and always want to be a part of something bigger. While on a team i have preference to be in the leadership although i know how to follow orders and give my opinion.
